Nürnberg, 5 February 2013

In the original certificate this space is reserved for the signatures of the Chamber of Commerce and Industry's Representative and the Chairman of the Board of Examiners.

Explanatory notes on the certificate

Johannes Kaufhold

born on 29 January 1989 in Nürnberg

Electronics Technician for Equipment and Systems

Field: Medical Technical Equipment

The overall grade is based on the weighting specified in the vocational training regulations and given below:

Part 1 of the final examination

Complex work task	40 percent
-------------------	------------

Part 2 of the final examination

Practical task	30 percent
System design	12 percent
Function and system analysis	12 percent
Economics and social studies	6 percent

The complex work task involves situational discussions as well as written and practical tasks.

The work assignment (Practical task) involves modifying a production system or a test system or producing a device or system. It tests process-related skills such as analysing work orders, procuring information, selecting and analysing professional solutions, planning and establishing work processes, ensuring professional and timely implementation, testing and documenting functions and safety, carrying out systematic searches for the causes of faults and defects, analysing, documenting and approving output and logging system data.
